TRADESMAN CABLE PREP KIT CABLE PREPPING MADE EASY

Introductory
Special

\$195

+ \$19.50 GST

Order Number:
7940044595

- AUTOMATIC Stripping & Cutting tool for flexible conductors with PVC insulation 0.08 to 6mm² in the one tool
- PROFESSIONAL Ratchet Crimper for Ferrules with or without plastic collars, cable sizes 0.14 to 6mm² in 1 crimp die, with Rotating head
- Slotted Screwdriver with a Professional soft finish and a non-slip handle
- 400 Wire End Ferrules with plastic collars in a carry case

TESTBOY'S VOLTAGE OR MAGNETIC FIELD TESTER

Both Only

\$29 each

+ \$2.90 GST

- Both are non-contact and include powerful LED torches
- Both approved to Australia Standard Cat II/1000V, AS 61010-1
- Voltage Tester for sensing 120 to 1000VAC
- Magnetic Field Tester has a self-test via permanent magnet

CLAMP METER 2606 FOR AC/DC CURRENTS

Super Deal

\$195

+\$19.50 GST

- Includes FREE carry case
- Measures voltages up to 1000V
- Continuity & diode testing
- Capacitance & frequency measurements
- Measures AC/DC currents - 400A/1000A ranges
- Resistance measurement & semiconductor test
- MIN/MAX memory, HOLD and PEAK functions
- Approved to Cat III/1000V to AS/NZS 61010-1

ORDER DETAILS	SALE PRICE	PART NO.
Clamp Meter	\$195 + \$19.50 GST	9427370000

ALL-IN-1 PORTABLE TEST & MEASURE KIT

Now Only

\$195

+\$19.50 GST

Order Number:
9427460000

- Includes AC/DC Clamp Head Device, Digital Multimeter and Test Leads
- Measuring AC & DC currents up to 600A
- Clamps conductors up to 30mm
- Approved to Australia Standards Cat III/600V AS 61010-1

No more con "fuse" ion

"Where are the fuses?"

This question is often asked by technicians and engineers and usually at the most critical of times.

In critical applications the need to replace a blown fuse can cause major issues unless you have the correct replacement fuses located nearby.

Industrial processes rely on fuses for over-current protection in all industries. Fuses can provide the best cost/protection ratio for many applications where circuit breakers would be unnecessary.

The problem that continually arises is where to keep the spare fuses. Are they in the store? In a cupboard? Nowhere to be found!

Weidmüller has taken away the con "fuse" ion with their new ZST1 spare fuse holder. The ZST1 easily snaps onto a TS35 DIN rail occupying the same space as a WSI6 fuse terminal. The swinging frame receptacle easily holds up to 6 spare fuses in the industry standard 5 x 20mm and 5 x 25mm sizes.

To ensure the correct fuses are replaced, individual marking of each fuse position is possible.

Tested to the IEC61373 shock and vibration standard for railway rolling stock, the ZST1 ensures secure and reliable storage of spare fuses. Removal of the fuse is simply achieved with the use of a screwdriver.

The ZST1 can be installed close to the fuse terminals, ready for quick, accurate and safe replacement.

Request your free sample today.

New Pro-M

Wide Range Input

Weidmuller's PRO-M range of high reliability switchmode power supplies continues to push the boundaries for innovation and user acceptance.

Introducing the new 10A PRO-M Wide Range Input Switchmode Power Supply. With the ability to be powered by an extremely wide range of inputs from 85 to 264VAC and 80 to 430VDC, there is no end to the applications that can be accommodated.

In addition to our unique input possibilities we have added an internal status alarm providing not only LED indication but the added flexibility of voltage free contacts to enable remote voltage monitoring.

Foremost in every engineers mind is reliability and safety of critical equipment. To this end we have increased the mains failure bridging from 20ms to 100ms, and offer an MTBF of greater than half a million hours.

Rounding out our advanced features we have included a full metal din rail mounting foot for increased stability on the rail. With vibration and shock testing to 5 g in all directions our new "advanced feature" power supply will give you confidence in any industrial application.

Power with Precision

The DRM range of plug in power relays are available in 2 & 4 pole with change over contacts and boast a load carrying current of up to 10A. All industrial coil voltages are available.

The DRM incorporates models with all the industry required features including LED indication, mechanical indication, test button and on the DC models free wheel diodes for back EMF suppression. Suitable for power switching the DRM relays come standard with contacts made from heavy electroplated silver alloy 270 microns thick. Signal switching models are also available with Gold plated contacts to assist with even lower signal applications.

The DRM Series Plug-In power/signal – High Quality for an economical price.

Circular Cut

Longitudinal Cut

Order Number:
9204190000

- Ingenious solution: the set screw allows you to adjust both the cutting depth and the type of stripping from a circular to a longitudinal cut in no time at all.
- Precise cutting: the top quality pivoting blade on the underside of the tool delivers absolute stripping precision. Insulation can be stripped from any desired point on the cable

INSTAPOWER POWER SUPPLIES 1 PHASE 25-48W

The new INSTApower single phase 25-48W power supplies provide the answer to a wide range of power supply needs. Just two different modules provide for all output voltages from 9 to 28V DC. An easily accessible trimpot is provided via an access port to enable wide adjustments to meet your requirements. Fully protected against overload INSTApower 48W provides up to 50% over current drive to start your load.

- Wide range of adjustment and universal AC/DC inputs
- Suitable for use as a DC/DC converter
- Ultra-compact only 70mm wide
- Mounts on standard TS35 DIN rail
- Local & international Approvals: CTick, CE, UL, CSA
