Premium Quality and Reliability

Smudge-proof and scratch resistant they are perfect for heavy-duty environments. Barcodes, graphics, photos and colour logos can be easily integrated in the label design. What's more, we can deliver both large batches and smaller numbers of long lasting labels and markers, quickly and efficiently.

Should you require a completely tailored solution then Weidmuller has the equipment and technical expertise to deliver your customised markers and labels.

Our CO2 Laser is perfect for printing on stainless steel and acrylic material. For larger or high volume projects our Router is ideal and handles sheet sizes up to 2400mm x 1200mm.

Material Options

Our range meets industry requirements including those for Halogen Free and VO Flammability. And, offering complete flexibility, you can print on a wide selection of materials:

- Polyamide
- Stainless steel
- Brass
- Aluminium
- Polyester
- Acrylic
- Heat Shrink
